All Weather, Inc. Deploys Canadian AWOS en Français

Sacramento, CA (November 3, 2010) – All Weather, Inc. (AWI), a leading manufacturer of weather information systems and meteorological sensors, has provided the southwest area of the Province of Québec with Automated Weather Observing Systems (AWOS) with the ability to broadcast automated weather observation reports in French and/or English. The French, English, or alternating languages voice broadcasts are configurable simply with the touch of a button.

“AWI AWOS systems are designed and developed to meet our customers’ expectations from varying language requirements to harsh weather conditions. The systems deployed in Canada will provide around-the-clock weather to locations that until now, have had limited or no access to timely weather information in a native language,” said Steve Glander, International Sales Manager for AWI.

AWI AWOS system outputs are available in a number of languages to meet your user community’s needs. Included in AWI’s AWOS offering are sensors for measuring wind speed and direction, temperature, humidity, rainfall, barometric pressure, lightning detection, present weather, cloud height and AWI’s dual-technology visibility sensor.

About All Weather, Inc.

AWI is a leading developer of high-accuracy; high-dependability weather information systems that help users minimize risks in an unpredictable world. The company provides AWOS aviation weather systems and air traffic control display systems, as well as a wide range of high-accuracy meteorological sensors and systems, including laser ceilometers, runway visual range systems, lightning detection sensors, and a variety of other meteorological sensors. AWI’s ASOS, AWOS, and AWSS systems meet the stringent

standards of the International Civil Aviation Organization (ICAO), the World Meteorological Organization (WMO), and FAA. AWI has installed more than 4,500 high-end automated weather systems and sensors around the globe, working with such leading authorities as the U.S. National Weather Service, FAA, ICAO, WMO and commercial users around the world.
