# **Colombian Airports Install All Weather, Inc. AWOS Systems**

Sacramento, CA (November 3, 2010) – All Weather, Inc. (AWI), a leading manufacturer of weather information systems and meteorological sensors, has provided several airports in the country of Colombia with the latest generation of AWOS systems. AWI is working with Aeronautica in Colombia to provide these systems to the civilian airport market.

The AWOS systems deployed by AWI are compliant with the International Civil Aviation Organization (ICAO) and produces voice outputs in the native language of Spanish. “AWI has provided a number of systems to both civil and military customers in the country of Colombia, and we have continued to enhance our AWOS solution to meet the needs of this emerging aviation market,” said Steve Glander, International Sales Manager for AWI.

Included in AWI’s AWOS offering are sensors for measuring wind speed and direction, temperature, humidity, rainfall, barometric pressure, lightning detection, present weather, cloud height, and AWI’s dual-technology visibility sensor.

### **About All Weather, Inc.**

AWI is a leading developer of high-accuracy; high-dependability weather information systems that help users minimize risks in an unpredictable world. The company provides AWOS aviation weather systems and air traffic control display systems, as well as a wide range of high-accuracy meteorological sensors and systems, including laser ceilometers, runway visual range systems, lightning detection sensors, and a variety of other meteorological sensors. AWI’s ASOS, AWOS, and AWSS systems meet the stringent standards of the International Civil Aviation Organization (ICAO), the World Meteorological Organization (WMO), and FAA. AWI has installed more than 4,500 high-end automated weather systems and sensors around the globe, working with such leading authorities as the

U.S. National Weather Service, FAA, ICAO, WMO and commercial users around the world.
